COMPANY PROFILE

Naturelle Pvt Ltd is based on the aim to provide the special sort of salt not only locally but globally as well. The company focuses on producing items to serve different purposes ranging from edible salt, animal lick salt, décor, lamp, culinary goods and salt for spa treatments.

Naturelle belongs to the Six B Food Industries group which has a well-built reputation in the local and global market and are highly known for their food products and the quality they provide. With good feedback from the market, Six B Food Industries has set foot in the salt industry with the aim to provide the same standard of products.

Pakistan is blessed with a rare type of salt, the Pink Salt and Naturelle aims at providing this salt locally and to other countries as it has proven to be healthy and useful for various needs. The Pink Salt is extracted from Himalayan Salt Mines and is processed to best meet the consumer's needs.

Naturelle brings this natural treasure from the mines to your table. Naturelle salt is the best salt for edible purpose as compared to sea salt. Its freshness and additional iodine keeps your health maintained. Its crystal and white grains show its purity and prove it as an international brand.

QUALITY POLICY

Naturelle Salt Refinery is committed to satisfy its customers with high value error free quality salt on time and every time. It is the vision of Naturelle Refinery to be a world-class leader in the field of Salt manufacturing. This vision will be met by providing salt, which consistently exceeds the expectations and specifications of our customers. Involving all our members and associates in an effort to continually improve the value of our products, processes and services. We are proud to say that we meet the standards defined by Kosher and are certified to refine, process and sell types of salt for consumption by humans and animals We are committed to continually keep on improving the effectiveness of our Quality, Food safety and top notch safety management system while ensuring it remains compliant to the highest standards using latest state of the art technologies. Corporate objectives will be routinely reviewed, to ensure they reflect the evolving needs of Naturelle , and that they continue to satisfy our customer's requirements.

ROCK SALT

The Rock Salt found in Pakistan is arguably amongst the best that can be found in the world. The purity levels of these rock salts can go up to 99% with minimum impurities. There are four different types of rock salts, in term of crystals, namely; pink solid crystals, white solid crystals, soft lumps, and soft crystalline lumps. The soft crystalline lumps are so soft that one can easily break them down with their hands only, hence the name.

SALT PRODUCTION

Pakistan is an excellent country for salt production due to the many salt ranges. The range s stretch from Kalabagh to Jhelum in the province of Punjab. Other than that, the geological surveys of the Pakistan Mineral Development Corporation (PMDC) have stated that there is about 2.65 billion tons of salt present in the province of Khyber Pakhtunkhwa alone. Furthermore, the reserves at Bahadurkhel in Kohat are estimated to be 10.54 billion tons.

EDIBLE SALT

(FOOD GRADE)

We proudly claim to provide 100% organic edible dark & light pink salt and black & white salt which is proved to be healthy for human consumption. Naturelle focuses on providing different sizes of salt to suit your needs.

Boosts your mineral intake with regular use.

Contains minerals like potassium and magnesium that help you get the most out of the sodium your body needs, while countering the negative effects of sodium.

Even though the mainstream has been demonizing salt in the name of heart health, you can consider salt, especially Himalayan pink salt, a health food

When scientists research the health effects of salt, they most commonly research table salt, which behaves differently in the body than other salts

Your body doesn't know what to do with table salt, which has way more sodium than other salts, plus it doesn't have other balancing minerals like potassium, calcium, and magnesium that counteract the negative effects of sodium

HIMALAYAN PINK ROCK SALT PLATE & BOWL

Eating in Pink Salt Culinary bowls and plates naturally imparts the incredible health benefits of Himalayan pink salt into your food. Such health benefits include balancing your body’s pH, stabilizing hydration levels, improving digestion and reducing acid reflux.

Because of these minerals Himalayan pink salt can:

- Create an electrolyte balance.
- Increases hydration.
- Regulate water content both inside and outside of cells.
- Balance pH (alkaline/acidity) and help to reduce acid reflux.
- Prevent muscle cramping.
- Aid in proper metabolism functioning.
- Strengthen bones.
- Lower blood pressure.

PINK SALT COOKING TILES

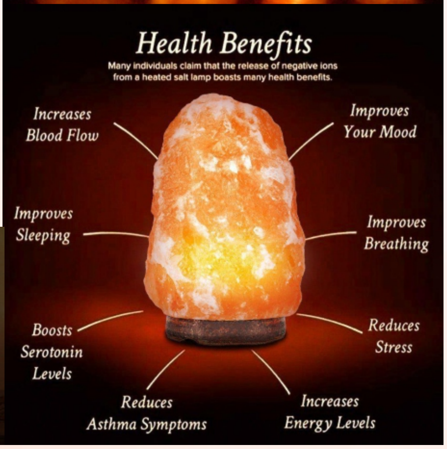
Himalayan pink salt slabs can be heated to as high as 450 degrees Fahrenheit and used to lightly sear all sorts of delicious foods. When the cooking is through, your mineral salt slab will slowly return to room temperature for future use as a cold serving plate.

- Adds healthy minerals and nutrients to your food
- More complex taste than table salt
- No need for additional salt, it just adds the right amount of taste to your food
- Extreme temperature resistant
- Heightens energy levels
- Makes your food more presentable
- Maintains the body's essential PH balance

HIMALAYAN ROCK SALT LAMPS

Himalayan rock salt lamps add a soothing and calm effect to your environment and it adds up to the fine ambiance of your indoor rooms. The pinkish hue adds a beautiful lighting to the room the lamp is placed in and is used widely across the globe as a special addition to the interior.

- Cleanse, Deodorize, and Purify Air.
- Balance Electromagnetic Radiation.
- Calm Allergies and Reduce Asthma.
- Alleviate Coughing and Other Symptoms of the Common Cold.
- Boost Blood Flow.
- Raise Energy Levels.
- Sharpen Concentration and Performance.
- Enhance Mood.



Health Benefits
Many individuals claim that the release of negative ions from a heated salt lamp boosts many health benefits.
Increases Blood Flow
Improves Your Mood
Improves Sleeping
Improves Breathing
Boosts Serotonin Levels
Reduces Stress
Reduces Asthma Symptoms
Increases Energy Levels

ROCK SALT TILES

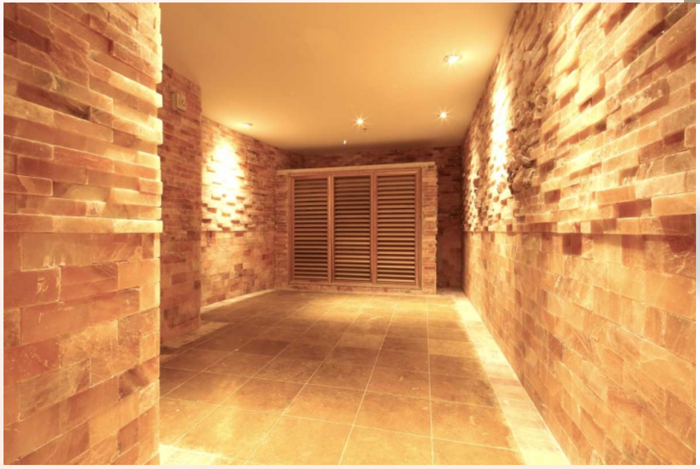
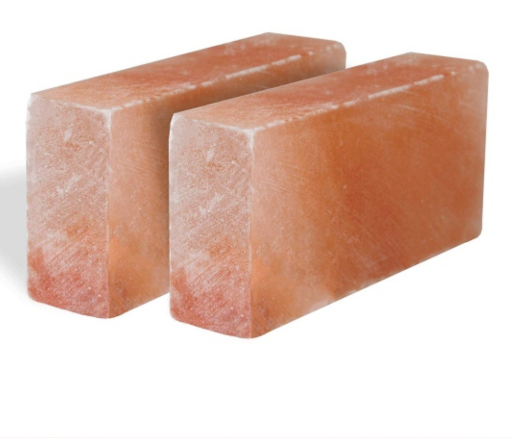
Our Salt tiles are made up of all natural and pure Himalayan salt that helps to maintain emotional well-being

- 100% pure Himalayan Pink Salt handcrafted salt brick
- Best for halotherapy and for asthma patients
- Allows for healthy breathing when placed in your home
- Helps your mind work more efficiently
- Make this natural commodity a part of your residence





SPA & SALT THERAPY

Taking wellness to another level, halo therapy — a.k.a. salt therapy — remains a top spa trend. (Halo is Greek for salt.) Salt therapy is similar to spending time in the salty sea air, which offers many more benefits than just relaxation on the beach.

Ancient healers and philosophers recommended salt inhalation for the respiratory system and health problems. Dry salt therapy originates from speleotherapy (cave therapy) and the Wieliczka salt cave in Poland, where workers exhibited fewer respiratory illnesses. There are thousands of salt rooms in Europe and beyond.

The benefits of salt therapy are wide-ranging. Salt levels affect our cell activity, energy and blood sugar levels. A natural disinfectant, salt is antimicrobial, and antibacterial. Salt comes in empty processed forms or healthier pure sea salt (Himalayan and Dead Sea salt) that contain 84 elements and trace elements found in the human body. Dry salt air is more powerful than moist air.

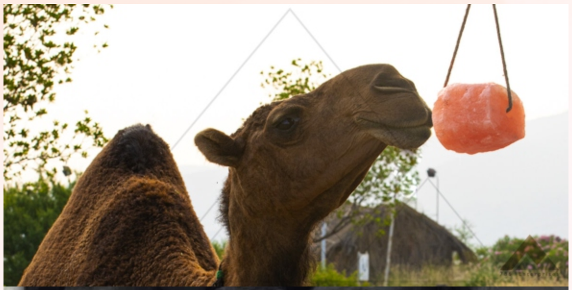
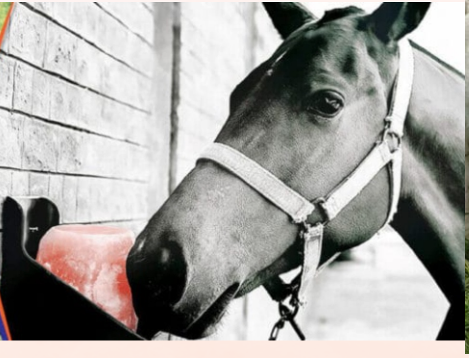
- balances skin pH
- softens skin
- and more!

ANIMAL FEED GRADE LICK HIMALAYAN ROCK SALT



In the same way that the benefits of rock salt for human consumption are evident, we provide rock salt to feed animals. It has become clear that animals have a natural appetite for salt, and this ensures that they grow properly and do not suffer from malnutrition and have properly working immune and reproductive systems.

- Decreases stressful behaviours such as constant licking , chewing on fences etc.
- Reduces nervous animal behaviours
- Strengthens immune system
- Helps animals develop shiny and healthy coats
- Helps harden the hooves of animals
- Restores salt lost by animals via sweating in hot climates
- Increase in the threshold at which animals/horses sweat with exercise
- Reduces animal drowsiness
- Increases feed intake
- Increases animal weight
- Increased farm efficiency and productivity



ESSENTIAL FOR ZOO ANIMALS

As the creatures are caged or put inside a limited boundary in a zoo, they are unable to get the required form of natural minerals they get from natural landscapes. Salt is one of the highly essential mineral these animals need sustain their health. Salt maintains the mineral balance of the animals at the right level and keeps the livestock healthy.

ROCK SALT FOR ROAD DE-ICING

LIQUID DE-ICER
STAY BACK 100 FEET

The Himalayan salt extracted by us from our mines in Khewra is crushes and graded to form Mogul Pink Himalayan De-Icing Salt which is sued for the removal of snow and it prevents any fresh layer of ice to get on that surface. This salt is majorly used in road maintenance, de-icing of roads, and even aircraft de-icing.

Naturelle offers its customers the option to demand salt for de-icing as per their required sizes and needs.

WATER TREATMENT

An aid to hydration. Some believe that adding a pinch of pink salt to meals or drinks can help the body achieve optimal fluid balance and prevent dehydration. It is true that sodium is necessary to maintain proper fluid balance.

HIMILAYAN SALT SOLE BENEFITS

- Improves Digestion
- Balances Body Fulid
- Energizes The Body
- Improves Sleep
- Provides Hydration
- Helps in Weight Loss
- Good for Skin, Hair, and Nails

FISH INDUSTRY

Salt , also known as sodium chloride or NaCl, has many potential applications in fish production. It effectively controls some parasites, minimizes osmoregulatory stress during transport, and prevents methemoglobinemia (brown blood disease) in channel catfish.

SHEEP CASING GRADE

The Sheep Casing Grade of salt is used mainly to preserve the sheep casings in Pakistan to later use for the manufacturing of leather. There are about 10 different grades of salt supplied to the customers with different requirements.

Salt has been used as a preservative for meat and fish products since thousands of years, throughout the world. In Pakistan, sheep casing industries use this salt, along with other techniques, to preserve sheep casings. Naturelle salt plays its role as the supplier of excellent quality salt, here as well. There are 10 different grades of salt that Naturelle salt offers the customers in the sheep casing industry.

CLEANING

The Himalayan Pink Rock Salt also plays an important role in the kitchen as it can be used to wash off smudges or stains from culinary items and metal utensils. The salt has proven to be much more effective than dish washes when it comes to permanent stains on your kitchen range.

LAUNDRY

Salt is a super stain remover on clothing, helps maintain bright colors, and can even eliminate sticky spots on your iron. It can also reduce yellowing in clothes and mildew on shower curtains. This article includes hints on how salt can be used while doing the laundry. We'll start with the care of colors. Please note: None of these tips should be tried with dry-clean-only fabrics.

GENERAL USES OF SALT FOR HOME

EXTINGUISH GREASE FIRES

A kitchen is a very cautious space and a box of salt should be kept near the stove and oven in case a fire accident occurs. Some fires can be extinguished with water but grease fires are hard to extinguish with water, instead the water spreads the fire and makes the condition even worse. Which is why salt is a good solution for grease fires.

TAME A WILD BARBEQUE

Salt is also proven to be essential to calm down a fiery barbeque grill as it reduce s the fire and smoke.

KEEP CUT FLOWERS FRESH

A dash of salt added to the water the cut flowers are put in enhances the life of the flowers and sustains them for longer period of time.

DETER PATIO NEEDS

If your Patio is constantly being ruined due to weeds or grass growing through bricks or blocks, you can sprinkle salt in the cracks to fix the issue.

DE-ICE SIDEWALKS AND DRIVE WAYS

Snowy weather can be very irritating when your porch, sidewalk or driveway get icy, a simple solution to the situation is that salt be used on the required areas to keep snow from bonding to the pavement and making scraping the snow easier.

DRIP PROOF CANDLES

Soaking new candles in a strong salt solutions for a few hours make them last longer than usual and they will not drip as much when you burn them.

DETER ANTS

Ants do not like walking on salt or being near it which is why salt is used on doorways, window sills and cabinet corners to repel ants from getting into areas of the house.

ROCK SALT FOR INDUSTRIAL USE AND DRILLING INDUSTRY

Salt has various uses In the Industrial Sector. It is used in the textile industry to fix and standardize the batches of dye, in the metal industry, salt is used in processing of metals and secondary aluminium making to remove impurities. It also plays an important role in the soap making, rubber, pigment and pharmaceutical industry etc.

Apart from that, solar power production and production of other energies require industrial salt to maintain a standard level of salinity for certain reactions to occur.

The premium grade rock salt by Naturelle is usually used in oil refineries and petrochemical industry. In oil refineries, when direct stripping steam from the stripper column is released, the hydro-desufurization units for jet and diesel reqire coalesce and salt dryer. The salt dryer completely avoids product off specification in water and appears hazy.

Size and size distribution of the rock salt particles is very important

Small particles cause severe corrosion in downstream system due to salt carry-over. On the other hand, large sized particles have significantly less effect on the surface area.
